SUMMARY

A results-driven DevOps Manager with **8+ years** of specialized experience in **cloud-native deployments, automation, and the creation of highly scalable, secure infrastructure** across both public and private cloud environments. Proven success in **leading high-impact DevOps initiatives, driving continuous improvement in CI/CD pipeline efficiency, and pioneering cutting-edge infrastructure solutions**. Expertise in accelerating time-to-market, increasing deployment reliability, and ensuring operational excellence. Adept at **delivering robust, high-availability solutions and leading teams** through the most complex enterprise transformations

SKILLS

Technical Skills:

DevOps Tools: GitHub, GitHub Actions, Azure DevOps, Bamboo, Jenkins (Basic)

Middleware Solutions: IBM WebSphere, MuleSoft Anypoint Platform

Containers & Orchestration: Kubernetes, Docker, OpenShift (exposure)

Scripting & Configuration Management: Shell, YAML

Infrastructure-as-Code (IaC): Terraform

Monitoring & Reporting Tools: SonarQube, Zabbix, Prometheus (learning), Grafana (learning)

Project & Repository Management: Jira, Confluence, Git, SVN

Operating Systems: Linux

Functional Skills: CI/CD Pipeline Development & Optimization | Automation & Scripting | Infrastructure Provisioning & Management | Containerization & Orchestration | Cloud Infrastructure Management | Performance Monitoring & Incident Response | Security & Compliance Automation | Version Control Management & Release Coordination | Collaboration with Cross-functional Teams (Dev, QA, IT, Clients) | Stakeholder Management & Client Communication | Team Leadership & Development | Process Improvement & Automation Initiatives

CAREER HIGHLIGHTS

- **CI/CD Pipeline Optimization:** Led the design and deployment of GitHub Actions CI/CD pipelines for over 550 TIBCO TCI applications, improving deployment efficiency.
- **Collaborative Release Management:** Streamlined release processes across DEV, SIT, and UAT environments by closely collaborating with development and QA teams.
- **Infrastructure Automation:** Spearheaded the automation of repetitive tasks and infrastructure provisioning using Shell scripting and Terraform across hybrid cloud environments.
- **Containerization:** Played a key role in integrating Docker and Kubernetes into existing infrastructure, significantly improving flexibility and scalability.
- **Security & Compliance:** Automated security processes, including vulnerability scanning, secret rotation, and compliance checks, within DevOps pipelines.
- **Performance Monitoring:** Established monitoring solutions using Zabbix, SonarQube, and explored Prometheus/Grafana stacks to ensure optimal system performance.
- **MuleSoft Administration:** Managed the MuleSoft Anypoint Platform, including business group setup and user access control, enabling smooth integration operations.
- **Cross-functional Leadership:** Directed initiatives within the DevOps Center of Excellence (CoE), overseeing tool migrations, infrastructure modernization, and the adoption of new technologies.

WORK EXPERIENCE

DevOps Manager | Cognizant Technology Solutions, India

Mar 2022 – Present

- Managed the automation of CI/CD pipelines using GitHub Actions for TIBCO BusinessWorks (TCI) and Flogo applications, accelerating delivery cycles.
- Administered 550+ GitHub repositories, ensuring optimized access control, branch protection, and automated workflows.
- Administered MuleSoft Anypoint Platform, focusing on business group setups and user access management for seamless integrations.
- Led the adoption of containerization technologies such as Docker and Kubernetes, enhancing application deployment flexibility.
- Collaborated with clients and internal teams to assess and modernize cloud infrastructure, recommending and implementing best practices.

Middleware & DevOps Administrator | Deloitte, India

Sep 2016 – Mar 2022

- Managed IBM WebSphere environments, ensuring optimized application setup, performance tuning, and deployment.
- Developed and maintained CI/CD pipelines using Bamboo, facilitating automated application deployment across different environments.
- Automated system administration tasks and workflow processes using Shell scripting and cron jobs, enhancing operational efficiency.
- Integrated observability tools like Zabbix into CI/CD workflows for real-time system monitoring and performance analysis.
- Coordinated release activities, including troubleshooting and post-release triaging, to ensure smooth deployments.
- Managed version control using Git and SVN, ensuring effective synchronization of development and deployment tasks.

EDUCATION

Bachelor of Science in Computer Science

Bhavan's Vivekananda College, Telangana, India, 2013 – 2016

CERTIFICATIONS & RECOGNITIONS

- GitHub Certified
- Employee of the Month
- Leadership Award
- Best Performer Award
- Superhero of the Team Award
- Spot & Applause Awards

LANGUAGES

English: Full Professional Proficiency, Hindi: Native, Telugu: Native

WORK PREFERENCES & RELOCATION

- Open to relocation or hybrid opportunities in Australia.
- Experienced in working with international teams, including clients based in the EU.
- Adaptable and proficient in cross-cultural, multilingual, and Agile environments.
- Willing to personally bear visa processing costs upon selection.
